F6 Student Activities Week (SAW) – Individual programmes

The objective of the SAW is to provide all students with the opportunity to engage in an experiential learning programme inside normal study time. The School has allocated this time for students to develop skills, knowledge and experience that they would not get inside the classroom. A lot of the programmes and opportunities will place students in situations that are outside of their comfort zone.

The F6 SAW is a combination of programmes that focus on academic and business study attachments, taking students out of the classroom situation and immersing them in a new learning environment. Being attached to universities and businesses students will be put in situations where they become responsible for their own learning and development. The F6 programmes offer students the opportunity to study in university environments, be responsible for research based learning, interact with experts in the fields of research and business and gain valuable experience outside the school. Our programme partners range from CUHK, HKU, HKUST and the HKAPA to BEA, COMPUTIME, ESQUEL and JOHNSON ELECTRIC.

These challenging programmes will require students to be independent in their decision making, confident to meet with new people, responsible to manage their own time and give them experiences that will help formulate their future goals. The experience in itself will be a powerful one and there will be a lot to gain and reflect upon beyond the academic benefits.
